America is now seeing an explosion of a new transgender crisis, according to cardiologist Dr. Peter McCullough.

"As COVID-19 eaves down, we've seen an explosion of a new transgender crisis," he told Jeffrey Prather during the July 14 episode of "The Prather Point" on *Brighteon.TV*. "A crisis where suddenly you know boys wanted to be girls, girls want to be boys. Men want to look like girls and the whole world is upside down with infatuation of living as the opposite gender and everything we see there is bad."

Citing papers on transgender medicine, McCullough noted that sex-changing hormones make children sick 59 percent of the time. He also pointed out that "gender-affirming" surgeries in both boys and girls have resulted in bad outcomes. Moreover, the cardiologist said transgender medicine has been associated with an increase in mortality and homicide, suicide and death from other causes. (Related: Science says there's NO EVIDENCE supporting transgender drugs, surgeries.)

Another paper on sexual medicine cited by McCullough said the psychiatric burden of disease arising from such gender procedures is even greater. These psychiatric issues, he added, get worse in children with neuro-psychiatric problems such as autism and attention deficit disorder.

Prather lamented that the medical community has also forgotten their ethics and their promise to abide by the Hippocratic Oath by proceeding with these gender surgeries. In reply, his guest noted that the ethics of these doctors are completely gone. McCullough pointed out that about 19 states are now working to ban transgender medicine for patients under the age of 18.

"It's sad that the states have to ban it, because no good doctor should actually do this," remarked the cardiologist. "It violates the Hippocratic Oath."

Rise of transgender medicine linked to TRANSHUMANISM

According to Prather, one way of corrupting the whole world is by modifying the human genome. Such methods of modifying the human DNA include the mRNA injections and CRISPR gene editing, which the former intelligence officer said lines up with the transhumanist agenda.

The cardiologist agreed, saying many people have aspirations of transforming humans. One person he cited was Klaus Schwab of the World Economic Forum (WEF), whose book titled "The Fourth Industrial Revolution" (4IR) serves as a manifesto of transhumanism.

"Engineers, designers, and architects are combining computational design, additive manufacturing, materials engineering, and synthetic biology to pioneer a symbiosis between microorganisms, our bodies, the products we consume and even the buildings we inhabit," the WEF's website said of 4IR back in 2016.

According to McCullough, the 4IR is all about "changing the human body, not changing the environment" – an idea that lines up with Schwab's goal. However, this goes against Scripture that clearly states that God created man.

"This is a worldwide crisis; it's a battle [of] good [versus] evil," he said. "Clearly trying to transform men into women and women into men is transhumanism, there is no doubt about it. And it seems like the cabal on transhumanism is large."

Watch the July 14 episode of "The Prather Point" with Dr. Peter McCullough below. Tune in to "The Prather Point" with Jeffrey Prather every Friday at 10-11 a.m. and every Saturday at 7-8 p.m. on *Brighteon.TV*.

"America seeing explosion of new TRANSGENDER CRISIS "

The only transgender 'crisis' we have is the one created by the US government. On purpose.
